

Need help promoting proper hand hygiene? Start with Remedy Skin Repair Cream.

One of the causes of poor hand hygiene is the dryness and irritation often associated with frequent hand washings. Remedy Skin Repair Cream not only offers protection against transepidermal water loss, it nourishes the skin as well.

Nourishing the skin with Olivamine™

Remedy Skin Repair Cream contains Olivamine, a molecular composition found only in Remedy products. Olivamine is a blend of antioxidants, amino acids, their co-factors (vitamins B₆ and B₃) and methylsulfonylmethane (MSM). The ingredients are all known to play a vital role in basic cellular construction and protection. Remedy Skin Repair Cream contains Olivamine to help provides an all-natural way to help deliver vital nutrients to the skin.

Preventing transepidermal water loss (TEWL)

Transepidermal water loss (TEWL) causes the stratum corneum layer of the skin to lose some of its protective properties and dehydrate. Remedy Skin Repair Cream helps prevent TEWL by providing a semipermeable barrier that protects the skin, while still allowing for normal cellular respiration.

The Components of Olivamine™

Agents

The 3 most abundant amino acids in pre-collagen and collagen – glycine, L-cysteine and L-proline

Vitamins A, B₃, B₆, C and D₃

The most potent antioxidants – Hydroxytyrosol (extracted from olives) and L-taurine (an important amino acid)

Methylsulfonylmethane (MSM)

Description

These amino acids are the main building blocks of collagen. Without a plentiful supply, collagen cannot be formed.

Supports ability of skin to efficiently utilize amino acids and other nutrients.

Protects cells and helps neutralize free radicals that can damage the skin.

MSM supports amino acid utilization, offers antioxidant properties and may slow the conduction of pain fibers.

Remedy Skin Repair Cream

Remedy Skin Repair Cream helps restore and maintain the skin's natural moisture balance while delivering vital nutrients to the skin.

Helps deliver essential nutrients to skin

Remedy Skin Repair Cream contains a higher level of Olivamine, designed for skin with higher care requirements and prone to irritation/skin breakdown. It also contains natural ingredients, such as certified organic aloe vera and primary fatty acids found in olive oil: oleic and linoleic acid. These are excellent skin nutrients and natural lipid replacements.

Provides effective barrier and balances moisture:

Contains dimethicone to provide a breathable moisture barrier that helps prevent transepidermal water loss (TEWL) and therefore, damage related to dehydration and dryness due to frequent hand washing

Doesn't interfere with CHG

Unlike other moisturizers, Remedy Skin Repair Cream won't interfere with the antimicrobial properties of CHG (Chlorhexidine Gluconate). It can be used before or after washing with CHG products.

Petrolatum and mineral oil free

These ingredients have been linked to latex degradation, which may interfere with the barrier properties of latex gloves.

Prolonged action means less product is needed

Remedy Skin Repair Cream requires less product to cover your hands and lasts longer, providing prolonged relief against itchiness caused by dryness. It is a daily therapy for the skin.

Enhanced Ingredients:

Olivamine™ (with amino acids, antioxidants, vitamins and MSM) and organic aloe.
